**RED ROCKET FLIGHT PLAN**

{Where Memes and Dreams Take Off}

## INTRODUCTION

Welcome to Red Rocket 🚀—the meme-coin that dares to dream big, laugh loud, and launch far. We're not just here for the ride; we're here to rewrite the rules. At Red Rocket, we believe that memes are the fuel of the internet, and dreams are the rockets that carry us beyond the moon. Together, we're creating a community where humor meets hustle, and the cosmos is just the starting line.

## WHAT WE STAND FOR

### RED ROCKET: WHERE MEMES AND DREAMS TAKE OFF

A celebration of meme culture and big aspirations, Red Rocket represents chasing dreams with a healthy dose of humor. We're here to unite the internet's most ambitious dreamers, create a space where laughs are currency, and launch a movement where anyone can hold a piece of the cosmos.

## THE RED ROCKET STORY

Red Rocket was born from a simple yet radical idea: crypto should be as fun as it is ambitious. We don't just want to get to the moon; we're here to laugh our way to Mars, build communities that thrive on shared humor, and show that meme coins can launch more than portfolios—they can launch movements.

## TOKENOMICS

### TOKENOMICS SUMMARY, 11.72 BILLION

Our journey to the stars was inspired by the vast expanse of space and the power of cosmic exploration. Originally envisioned as **3 trillion tokens**, symbolizing the 3 astronomical units (AU) of a round trip from Earth to Mars, we refined this vision to create a more focused and meaningful approach for Red Rocket.

With **11.72 billion tokens**, we maintain the spirit of the **3 AU journey**, but present it in a way that balances simplicity, precision, and accessibility. Each token represents fuel for the rocket: the more we burn, the higher we soar. This isn't just a meme coin—it's a cosmic adventure with purpose and scarcity driving its value.
